

BRAKE PROPORTIONING VALVE R 61 010

The R 61 010 brake proportioning valve is synonymous with reliability

The different load distribution over the front and rear axles during braking requires the adjustment of the braking force itself, which is managed by the brake proportioning valve. The correct operation of Brembo brake proportioning valves is constantly checked on test benches, where durability tests are also conducted, during which the products are subjected to various cycles with variable load and operating temperature.

- ✓ OE-equivalent
- ✓ Brembo quality
- ✓ Safety
- ✓ Durability

Technical specifications

EAN code
8432509613450

Axle

Threading
10 x 1 (2), 12 x 1 (2)

Material
Cast Iron
