

RC BRAKE PAD 07KA28RC

The 07KA28RC brake pad is synonymous with reliability

A compound designed solely for track use, a true racing pad ideal for all types of competition. The main characteristics of this compound are high friction and consistent performance, especially at high disc temperatures. These properties ensure excellent and uniform braking, making fading less likely to occur. The efficiency of this compound is limited at low temperatures and, consequently, it is not type-approved for road use.
