

BEYOND EV DISC 09.A532.2E

Brake disc 09.A532.2E is designed for electric cars

The use of regenerative braking, in electric vehicles, entails a more discontinuous use of the friction brake compared to a car with a combustion engine. For this reason, special attention is required to avoid the corrosion of brake discs and brake pads. The Brembo EV brake disc is coated with a special protective treatment, and when used in combination with Brembo EV brake pads, it avoids early corrosion of the braking system, keeping it effective and safe for longer.
