

UPGRADE GT KIT

1Q2.9609A_

The 1Q2.9609A_ GT kit is synonymous with superior performance

Complete braking systems, comprising components derived from the world of motorsports and offering unrivalled levels of technology on the market. They feature aluminium radial-mounted fixed calipers, with opposing pistons. Depending on the type of system and the required performance level, the calipers can either be in two-parts, monoblock or even monoblock machined from solid billet metal. The uprated brake discs can be integral (one-piece) or composite, drilled or slotted.

A cross-sectional diagram of a microstructure. It shows a central layer of thickness C on a substrate of thickness TH . The width of the central layer is B . The total width of the substrate is labeled with the symbol $\varnothing$. The diagram is labeled with 'A' on the right and 'TH=' on the left.

Axle	Diameter	Thickness (TH)
Front	412 mm	38 mm
Caliper pistons	Disc type	Caliper type
8	2 pieces	BM monoblock

COMPATIBLE VEHICLES
